

SERVICE DETAILS

The Madagascar Feeder Service connects three niche ports on the Island to the Comoros, and to the rest of the world (over transshipment hubs Mutsamudu and Jebel Ali). Having re-entered the market in March 2017 – UAFL answered the market's call for an alternative Carrier to cater for their shipping needs. This service consists of UAFL operated vessels and sails on a 12-day frequency from transshipment hub, Mutsamudu. With this service UAFL continues to give our Customers the option of choice, a valued and necessary pre-requisite for their business activities.
